John,

All I can tell you is that the County Manager is looking at revising the county's e-mail policy about using the e-mail for non-county business. As a general rule, we ought to discourage county employees from using county resources for non-county business, but the rule of reason ought to apply.

Robert

Robert, I hate to bother you with such a small issue while you have bigger things going on...Do you have any comment about a County employee using a County PC to transmit the resume to the Employee Relations Department when applying for a job.

John

**Subject:**

We were advised by a Department employee that it is unethical to have employees send their resume via the Region Office e-mail, to personnel when applying for a County job. Can you verify this. I would rather the employee spend 5 minutes in the Region Office than spending a hour and a half to drive downtown. If it is unethical we will advise all Region staff.
