ENQ 04-26

Sorry for the delay in responding, but the critical question is whether the South Florida Workforce is considered a County agency. If the answer is no, then our office has no jurisdiction to render an opinion. If the answer is yes, then any full-time employee of a County agency who is compensated by a third party must complete a Request for Outside Employment and receive permission to engage in these outside activities.

I hope this helps you.

Sincerely,

Robert Meyers, Executive Director
Miami-Dade Commission on Ethics

A situation has recently come to my attention. The SFETC d/b/a South Florida Workforce administers federal funds for workforce programs for the community.

My question: Is it appropriate for an employee of the SFETC/SFW to become employed (non-salaried) as an "Affiliated Faculty" for the purpose of building a relationship..establishing linkages" with the education community? Is this employee exempted from completing a Request for Outside Employment?
