Subject: RE: Conflict of Interest

Dear Mr. Redmon:

As promised, the following is a written opinion regarding any potential conflicts of interest for Heery Int. The relevant facts are that Heery Int. currently works under contract for Jackson Health Systems as a program manager. Vitas Corporation is interested in leasing space (one floor) at Jackson North. Vitas would like to hire Heery to do the design work for this space. The question presented is whether Heery's status as a program manager at Jackson Health System creates a conflict of interest prohibiting the company from engaging in the design of the floor at Jackson North for Vitas.

Given the fact that the duties and responsibilities between Heery and Jackson whereby Heery is retained as a program manager will not overlap with any design work Heery does for Vitas at Jackson North, a conflict of interest has not been created.

If you have any additional questions, please do not hesitate to contact me at your convenience.

Sincerely,

Robert Meyers, Executive Director
Miami-Dade Commission on Ethics and Public Trust

Per our conversation on 7/13 regarding Heery Int. Doing design work for a vendor who will be leasing space at the Jackson North hospital. Heery is currently working for JHS as a program manager.
